COVER PHOTO FEATURING: **WALLDRAIN/TILEIN**

A contemporary look that has no contemporaries.

Meet QuickDrain. An elegant blend of design, versatility and functionality. It's not only the most complete and fastest-installing linear drain system, it's also cost-effective.

From wall-to-wall, QuickDrain provides total surface coverage, improving water evacuation, installation time and so much more.

With a variety of styles and options to choose from, there are a myriad of ways QuickDrain can turn an average bathroom into a welcome break from the everyday.

All in just a few hours.

DESIGN STYLE:
COSMO

Design matters.

Design is an integral part of the QuickDrain experience. Elegance and performance working together in tandem, a seamless blend of style and engineering.

More than a linear drain, QuickDrain is a sophisticated curbed or curbless total shower solution, full of refined detail.

Experience. Design. Authenticity. Quality.

Beautiful design is one thing. Pairing it with superior performance is another. Every engineering and design choice was intended to make QuickDrain as efficient as it is appealing.

DESIGN STYLE: HORIZONTAL

TOPICAL LIQUID AND SHEET WATERPROOFING KITS CAN BE ORDERED SEPARATELY. WALLDRAIN AND PROLINE SHIP WITH THE TOPICAL LIQUID WATERPROOFING KIT. >

Complete Water Evacuation

Whereas a traditional center drain requires a custom slope from a variety of directions, QuickDrain is situated parallel to the shower entry, creating a single flat surface, with stable and consistent flooring. And, the drain sits shallow enough in the subfloor, eliminating the need to recess the entire shower floor.

Most importantly, the QuickDrain's QuickFlow System creates wall-to-wall coverage and promotes the effective and efficient drainage of water.

Simple installation. Wall-to-wall coverage.

QuickDrain is a complete shower system that reimagines how a linear drain should perform and be installed. QuickDrain slashes construction time, saves on cost and minimizes impact on customers.

One plane. No errors.

Instead of a four-way compound slope toward the drain, the QuickDrain shower system requires only a one-directional slope. This improves drainage, giving water one uniform path toward the drain, minimizing installation errors.

All in a matter of hours.

Projects with a traditional mud bed and pan liner application require a minimum of two days to construction, waiting for mortar to set. The QuickSlope panel system can be completely installed in less than one day.

Easy access.

Most retrofit drain systems need to access plumbing from the bathroom below, resulting in lost hotel revenue and a major inconvenience for residential applications. Its ability to work with existing plumbing makes QuickDrain the ideal choice for tub-to-shower conversions.

Less labor.

The QuickDrain system allows installers to move on to the next job quickly. The pre-sloped PET panels eliminate the need to float a pitched mud bed and wait for it to cure, saving big on labor cost.

Made for a job that demands flexibility.

No two shower installations are exactly alike. That's why QuickDrain can adapt to jobsite conditions, allowing installers to create the ideal shower for customers.

Adjustable height.

Stackable spacers mean installers can easily adjust the drain cover after installation to ensure the cover is flush with the floor.

Adjustable length.

Trough extensions and covers can be trimmed at the jobsite after the body is installed, providing wall-to-wall coverage.

Versatility.

QuickDrain can be installed by connecting to the drain waste line or used with a traditional 2-piece clamping collar drain body.

Commitment to community.

As part of our commitment to minimize our environmental footprint, we use 100% recycled plastic bottles (Polyethylene Terephthalate or PET) to manufacture our QuickSlope shower panels. These non-reactive, economical and shatterproof parts do not degrade over time and perform even under the toughest conditions at 145 PSI.

If you're looking to obtain LEED certification for your next project, please contact a QuickDrain representative to hear about our selection of environmentally conscious products, which may qualify for LEED points.

< QUICKDRAIN PRE-SLOPED
PANEL MADE FROM 100%
RECYCLED PLASTIC

13 million+ Plastic Bottles Recycled

For every QuickDrain shower installed, 450 plastic bottles are saved from landfills – 13 million bottles and counting.

Performance in curbless...

When QuickDrain is installed with a curbless entrance, it creates an easy, seamless transition from dry to wet areas in the bathroom.

Universal Design & ADA Compliance

The roll-in shower is a hallmark of universal design, making the shower easily accessible to all ages and abilities in accordance with the Americans with Disabilities Act. It also provides a clean and expansive look, from traditional to modern aesthetics.

Improved Hygiene

A curbless QuickDrain shower can be designed with larger format tiles, reducing the number of grout joints and seams where mold, mildew and grime can take hold.

Flooring Options

There are nearly limitless design options, as QuickDrain makes it possible to use nearly any imaginable finish or flooring material.

DESIGN STYLE: STREAM

and curbed showers.

Shower curbs serve as the barrier between the shower pan and the rest of the bathroom floor. QuickDrain can offer an attractive solution in these scenarios.

Versatile

With QuickDrain, there's no need to move plumbing or adjust the shower pan. QuickDrain can adapt to almost any existing plumbing condition.

Showers without an ADA Requirement

When wheelchair accessibility is not necessary, QuickDrain installations with a curbed shower can give a bathroom a sense of separation from the rest of the room and help visually frame the shower area.

Flexible Orientation

QuickDrain can be placed in any orientation in the shower, just as long as it runs from wall to wall to effectively promote water drainage.

DESIGN STYLE: COSMO

WALLDRAIN

Stunning luxury that takes showering to a whole new level.

SHOWERLINE

The smart choice for tub-to-shower conversions.

PROLINE

Ideal for spec-focused jobs
like healthcare facilities.

WALLDRAIN

DESIGN STYLE: TILEIN

A sight unseen.

WallDrain offers the ultimate in shower luxury and design innovation, pushing performance to its limit. It breaks the traditional rules of shower drain systems and goes beyond the limits of convention.

Because WallDrain is built into the wall instead of the floor surface, it offers a totally concealed and sleek look. You've never seen a drain like this before.

ELEGANCE IN DESIGN

Open up a world of design possibilities.

EASY ACCESS DRAIN COVER

A series of magnets allow for simple removal and reattachment.

CLEAN LINES

Create a seamless visual flow within your bathroom.

Sample SHOWER Kit

- A - F:** **Sample Drain Body Kit** - ShowerLine shown below, or choose ProLine or WallDrain.
- G - I:** **Sample QuickSlope Kit** - QuickSlope PET (polyethylene terephthalate) rigid foam panels, made from 100% recycled plastic bottles, considerably reduce installation time and labor cost when used in place of a traditional poured shower pan.
- J - N:** **Sample Waterproofing Kit** - Topical Sheet Waterproofing and installation supplies shown below. Other waterproofing options include Topical Liquid, Hot Mop, CPE/PVC Liner or Copper Pan, depending on type of installation.

For a complete list of QuickDrain parts, materials and design options, visit QuickDrainUSA.com.

Ordering QuickDrain is fast & simple.

When you're ready, you'll contact your local QuickDrain USA dealer to place your order.

To make the ordering process seamless, complete the following simple steps to guide you through the process:

- 1 Verify structural integrity within shower footprint (level sub-floor and square framing).
- 2 Sketch the desired shower layout with measurements – include drain location and sub-floor material.
- 3 Choose the following:
 - a. Drain Body Length - according to what will fit into the space.
 - b. Waste Outlet - vertical or side (horizontal) waste outlet configuration.
 - c. For non-standard sizes, multi-waste outlets and more, QuickDrain can help you customize a drain body. Lead times will apply. Please contact us at info@quickdrainusa.com.
- 4 Select Drain Cover and/or Finish (not applicable with WallDrain)
- 5 Select Waterproofing Option
 - a. Waterproofing Accessories - WallDrain and ProLine assembly kits include standard liquid waterproofing accessories. ShowerLine waterproofing kits are purchased separately. Additional accessories can also be purchased. The actual liquid will be supplied by the installer.
- 6 To make installation even easier, consider QuickDrain QuickSlope PET panels, available for both curbed and curbless applications.
